SUMMARY

Computer Science student specializing in Artificial Intelligence and Machine Learning with practical experience in developing intelligent systems, full-stack applications, and data-driven solutions. Proficient in building scalable models, optimizing performance, and applying modern tools to solve real-world problems. Strong analytical mindset with a focus on continuous learning and delivering efficient, technology-driven outcomes.

SKILLS

- **Programming & Languages:** Python, SQL, HTML, CSS, Java (Basic)
- **Tools & Platforms:** GitHub, Docker, MySQL, VS Code, Jupyter Notebook
- **Core Concepts:** Machine Learning, Computer Vision, API Integration, Data Processing
- **Professional Skills:** Application Development, Debugging, Testing, System Maintenance, Performance Optimization, Documentation, Continuous Learning

EDUCATION

•Bharat Institute of Engineering & Technology

B.Tech in Computer Science and Engineering (AI & ML) — CGPA: 7.6

2021 – 2025

PROJECTS

•Smart Traffic Control System

Python, OpenCV, YOLO

- Engineered a real-time vehicle detection pipeline using YOLO and OpenCV to accurately identify and track traffic density.
- Designed adaptive signal control logic that dynamically adjusts timings based on live congestion patterns.
- Reduced manual traffic intervention by automating decision-making through computer vision-driven insights.

•Product Recommendation System

Python, Machine Learning

- Developed a machine learning-based recommendation engine by analyzing user interaction and behavioral data.
- Applied data preprocessing and pattern recognition techniques to improve relevance of suggested products.
- Enhanced personalization by generating data-driven recommendations aligned with user preferences.

•AI Chat Assistant

React, API Integration

- Built a real-time AI chatbot interface using React with seamless API integration for dynamic response generation.
- Implemented efficient request handling to process user queries and deliver fast, context-aware replies.
- Improved user interaction experience through intuitive UI design and responsive conversation flow.

CERTIFICATIONS

- Data Analysis Certification — IBM
- Artificial Intelligence on Azure Certification
- Data Science Certification — Coursera
- Google Cloud Image Captioning Certification
